Key Questions & Answers (Practical 2)

Q: Are semantic tags such as header, nav, main, section, article, aside, and footer used properly?

A: Yes. This is the only page that uses the full semantic set - header, nav, main, section, article, aside, and footer are all present, with <article> wrapping the "Latest Notice" and <aside> wrapping the "Quick Links" block.

Q: Are form labels, headings, image alt text, and navigation links accessible?

A: Mostly yes. The image has a descriptive alt attribute (alt="Student Portal"), headings (h1/h2/h3) are used in order, and all nav links use readable link text. There is no form on this page, so form-label accessibility does not apply here.

Q: Is the page structure consistent across all pages?

A: Yes. The header, 10-link nav bar, and footer match the same structure/wording used on every other page in the site.

About (about.html)

Webpage Screenshot

Key Questions & Answers (Practical 2)

Q: Are semantic tags such as header, nav, main, section, article, aside, and footer used properly?

A: Partially. header, nav, main, section, and footer are used correctly, but article/aside are not used even though the "Objectives" list could reasonably sit inside an <article>.

Q: Are form labels, headings, image alt text, and navigation links accessible?

A: No form or image is present, so those checks don't apply. Headings (h2) are used correctly and nav links are accessible plain-text anchors.

Q: Is the page structure consistent across all pages?

A: Yes. Same header/nav/footer markup and the same 10 nav links as every other page.

Register (register.html)

Webpage Screenshot

The screenshot shows a web page titled "StudentHub Portal" with the subtitle "Student Registration". The page has a dark blue header with the title and subtitle, and a light blue navigation bar with links: Home, About, Register, Login, Dashboard, Events, Profile, Contact, Admin, and FAQ. The main content area is light gray and contains a white registration form titled "Registration Form". The form has five input fields: "Full Name" (text), "Enrollment Number" (text), "Email" (text), "Password" (text), and "Department" (dropdown menu). The "Department" dropdown is currently set to "Computer Engineering". Below the input fields is a blue "Register" button. The footer is dark blue and contains the copyright notice "© 2026 StudentHub Portal".

Key Questions & Answers (Practical 2)

Q: Are semantic tags such as header, nav, main, section, article, aside, and footer used properly?

A: Partially. header, nav, main, section, and footer are correct, but the registration form is not wrapped in an `<article>` even though it is the page's primary content block.

Q: Are form labels, headings, image alt text, and navigation links accessible?

A: Needs improvement. The 5 `<label>` elements are not linked to their inputs with matching `for/id` attributes, so a screen reader cannot reliably associate "Full Name", "Email", etc. with the correct field. There is no image on this page. Nav links are accessible.

Q: Is the page structure consistent across all pages?

A: Yes. The header, nav, and footer are identical in structure to the other 9 pages.

Key Questions & Answers (Practical 2)

Q: Are semantic tags such as header, nav, main, section, article, aside, and footer used properly?

A: Partially. header, nav, main, section, footer are used correctly; no article/aside, which is acceptable here since the login form is the only content.

Q: Are form labels, headings, image alt text, and navigation links accessible?

A: Needs improvement. Both <label> elements (Email, Password) lack for/id linkage to their inputs, the same accessibility gap as the Register page. No image is present. Nav links are accessible.

Q: Is the page structure consistent across all pages?

A: Yes. Structure matches the rest of the site exactly.

Webpage Screenshot

Key Questions & Answers (Practical 2)

Q: Are semantic tags such as header, nav, main, section, article, aside, and footer used properly?

A: Partially. header, nav, main, section, footer are used correctly. The six dashboard cards (Attendance, Assignments, Results, Notices, Events, Profile) sit in plain `<div class="card">` elements rather than `<article>`, even though each card is an independent, self-contained unit of content.

Q: Are form labels, headings, image alt text, and navigation links accessible?

A: No form or image on this page. Headings (h2/h3) are used correctly for the welcome message and card titles. Nav links are accessible.

Q: Is the page structure consistent across all pages?

A: Yes. Same header/nav/footer as every other page.

Events (events.html)

Key Questions & Answers (Practical 2)

Q: Are semantic tags such as header, nav, main, section, article, aside, and footer used properly?

A: Partially. header, nav, main, section, footer are correct; the events table itself could be considered for wrapping in an <article>, since it is standalone, syndicate-able content.

Q: Are form labels, headings, image alt text, and navigation links accessible?

A: The events <table> uses proper <th> header cells, which is good for accessible tabular data. No form or image is present. Nav links are accessible.

Q: Is the page structure consistent across all pages?

A: Yes. Consistent with the rest of the site.

Key Questions & Answers (Practical 2)

Q: Are semantic tags such as header, nav, main, section, article, aside, and footer used properly?

A: Partially. header, nav, main, section, footer are correct. Note the nav on this page links to "event.html" (singular) instead of "events.html", which breaks navigation consistency with the other 9 pages.

Q: Are form labels, headings, image alt text, and navigation links accessible?

A: The profile <table> uses <th> for row labels (Name, Enrollment Number, etc.), which is accessible. No form or image is present.

Q: Is the page structure consistent across all pages?

A: Mostly - layout matches the other pages, but the broken "event.html" nav link is an inconsistency worth fixing.

Contact (contact.html)

Webpage Screenshot

The screenshot displays the 'StudentHub Portal' contact page. The header is dark blue with the portal name and a 'Contact Us' link. A navigation bar below the header contains links for Home, About, Register, Login, Dashboard, Event, Profile, Contact, Admin, and FAQ. The main content area features a white 'Contact Form' box with a title, three input fields for 'Full Name', 'Email', and 'Message', and a blue 'Send Message' button. The footer is dark blue with copyright information.

Key Questions & Answers (Practical 2)

Q: Are semantic tags such as header, nav, main, section, article, aside, and footer used properly?

A: Partially. header, nav, main, section, footer are used correctly; no article/aside, which is acceptable since the contact form is the page's only content block.

Q: Are form labels, headings, image alt text, and navigation links accessible?

A: Needs improvement. All 3 <label> elements (Full Name, Email, Message) are not linked to their inputs via for/id, the same gap seen on Register and Login. No image is present. Nav links are accessible.

Q: Is the page structure consistent across all pages?

A: Yes. Structure matches the rest of the site.

Key Questions & Answers (Practical 2)

Q: Are semantic tags such as header, nav, main, section, article, aside, and footer used properly?

A: Partially. header, nav, main, section, footer are correct. The six admin cards (Students, Faculty, Attendance, Results, Notices, Events) use plain `<div class="card">` rather than `<article>`, same as the Dashboard page.

Q: Are form labels, headings, image alt text, and navigation links accessible?

A: No form or image on this page. Headings (h2/h3) are used correctly. Nav links are accessible.

Q: Is the page structure consistent across all pages?

A: Yes. Same header/nav/footer pattern as every other page.

FAQ (faq.html)

Webpage Screenshot

Key Questions & Answers (Practical 2)

Q: Are semantic tags such as header, nav, main, section, article, aside, and footer used properly?

A: Partially. header, nav, main, section, footer are correct, but each Q&A block sits in a plain <div class="question"> instead of an <article>, even though each question/answer pair is independent, self-contained content - a textbook use case for <article>.

Q: Are form labels, headings, image alt text, and navigation links accessible?

A: No form or image on this page. Headings (h2 for the page title, h3 for each question) are used in a logical order. Nav links are accessible.

Q: Is the page structure consistent across all pages?

A: Yes. Structure matches the rest of the site.
